

Series	AGM Special
Catalog number	658AGM-CS
Single package	1
Layer / Palette	12/48

AGM SPECIAL are modern car batteries produced in glass mat technology (Absorbent Glass Mat). The batteries are designed for a wide range of applications requiring deep discharge and as starting batteries for passenger cars. You no longer need to have two batteries with you, one for starting and the other for power supply.

Application: passenger cars, passenger cars with START-STOP system, vans, sailing and motor boats, caravans, wheelchair, lighting and navigation systems.

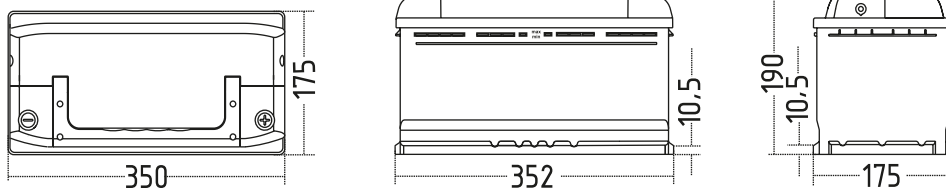

Construction: AGM (Absorbent Glass Mat) technology, fire protection, special sets of plates, additional separation, handles integrated with the lid.

Advantages: electrolyte leakage proof, the highest safety of use, high cyclic durability, increased resistance to sulphidation, increased capacity activity, longer battery life, resistance to high and low temperatures, total maintenance-free.

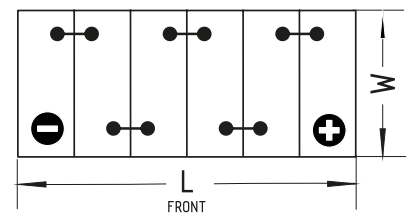

Voltage	[V]:	12	Base hold-down	B13
Battery capacity	C20	[Ah]: 95	Polarity	2
Starting curr	CCA	[SAE]: 900	Type of poles	1
Length	[mm]	352	Case Type	L5
Width	[mm]	175	Magic Eye	-
Height	[mm]	190	Fire protection	X

TECHNICAL DRAWINGS

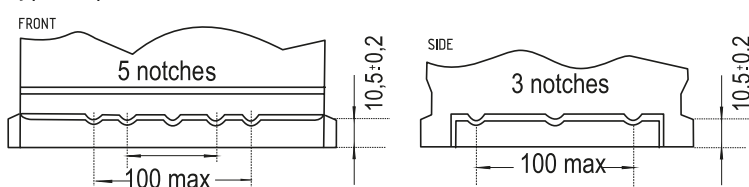

Box Type

Polarity **2 / 12V**

Type of poles **1**

Base hold-down **B13**
