

Klondike® SERIES

REPLACEMENT FAN CLUTCH and REPAIR KITS FOR KYSOR® K26RA and K30RA

Horton's Klondike Series® allows you to benefit from Horton's industry-leading customer service and quality even if you are running our competitors' fan drives in your fleet.

Our rear-air Klondike 26 fan clutch fits most competitive applications and is easy to maintain. It was designed to keep your vehicle running even if the fan clutch fails. The clutch will engage without air pressure, keeping your engine cool until you can get it in for servicing.

Our reformulated friction liner compound delivers substantially longer life than competitive products. All Klondike kits and components are interchangeable with the original-equipment K26 and most K30 fan drives. Refer to the second page for details on repair kits.

You can count on Horton to not only provide the reliable, durable products you need, but to deliver them on time.
